

3. Mr. and Mrs. Jackson are buying a new house. They are deciding between the two floor plans below.

large & subtract

break apart & add

Which floor plan has the greater area? Show how you found your answer on the drawings above. Show your calculations below.

large $\Rightarrow 8 \times 10 = 80 \text{ sq.m.}$

$80 \text{ sq.m.} - 10 \text{ sq.m.} = 70$

House A has a greater ^{sq.} area than House B.

House A $\Rightarrow 70 \text{ sq.m}$

House B $\Rightarrow 60 \text{ sq.m}$

$$\begin{array}{r} 40 \\ + 16 \\ \hline 56 \end{array} \quad \begin{array}{r} 56 \\ + 4 \\ \hline 60 \\ \text{sq.m} \end{array}$$
