

Name _____ #

mixture	color	matter	mass	shape
substance	properties	size		

Use the words in the box to complete the sentences.

Matter is everything around us.

Matter has mass and properties.

Some examples of properties are color, size, and shape.

A mixture is 2 or more substances that are put together.

**** On the back, draw a picture of a balance with an object on each side—then write a sentence to explain it.
(hint: make sure you use the word "mass")
