

Strategies we are using to subtract:

① base 10

draw the larger amount in base 10 blocks. Then X out the smaller amount. If you don't have enough ones, you will have to trade a group of 10's.

example: $50 - 35$

② break it apart

(keep the big # all together)

example: $50 - 35 =$

becomes $50 - 30 - 5 =$

$\swarrow$
 $20 - 5 = 15$

③ # line

$$50 - 35 = ?$$
