2nd Grade – Unit 8 Pre-Test
1)   Divide the circle into 3 equal parts. Shade a third of the shape with your pencil.

2)   Divide the shape into 2 equal shares. Shade a half of the shape with your pencil.

3)   Circle the shape(s) that represent $\frac{1}{2}$.

4) Partition each rectangle into fourths. Show three
   different ways.   2.G.3

5) Explain how you know that each part is a fourth?   2.G.3
_____

_____

_____

_____

Write a fraction to show what fraction of the shape is shaded.

                                                          2.G.3

6)   7)   8)   9)

_____   _____   _____   _____

Solve for each addition and subtraction below. Show your work.

2.OA.2

10)   27 + 18 = _____   11) 15 + 33 = _____

12)   32 – 26 = _____   13) 44 – 15 = _____

14)   **Find the sum of 37 + 19 in two different ways.**   2.OA.2

First method:	Second method:

Explain one of your strategies from above.

_____

_____

_____
